

Mostovi

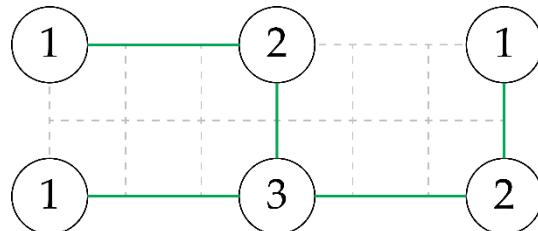

- a) Pri tej nalogi moraš otroke povezati z mostovi.

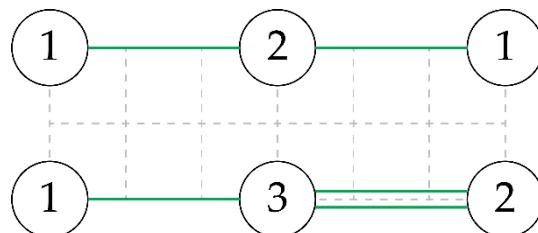

- b) Mostovi so lahko zgrajeni vodoravno ali navpično, vendar se ne smejo križati. Med dvema otokoma sta lahko največ dva mostova.

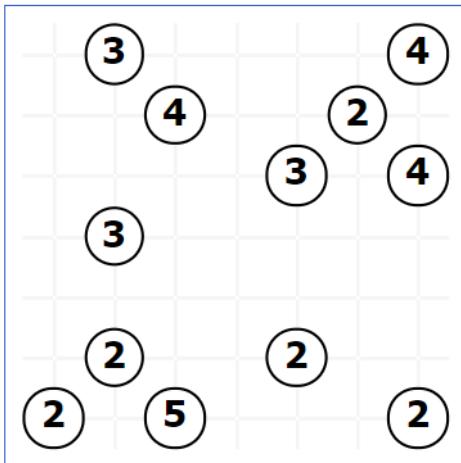

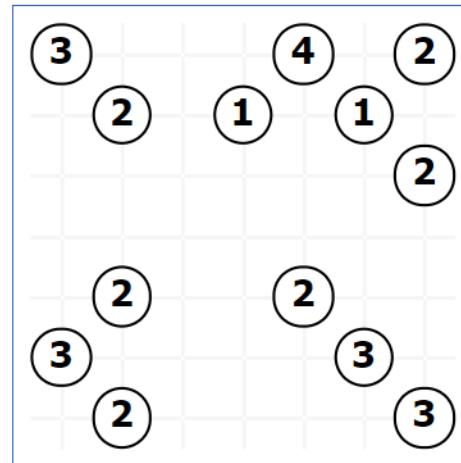

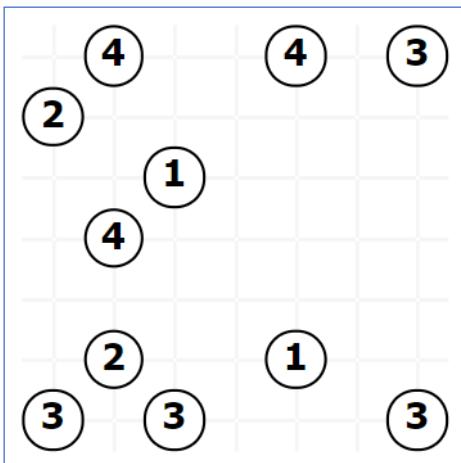

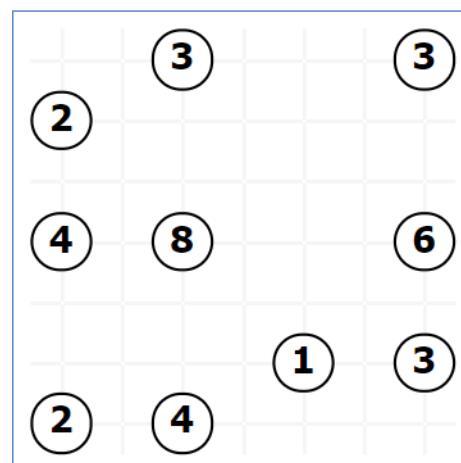

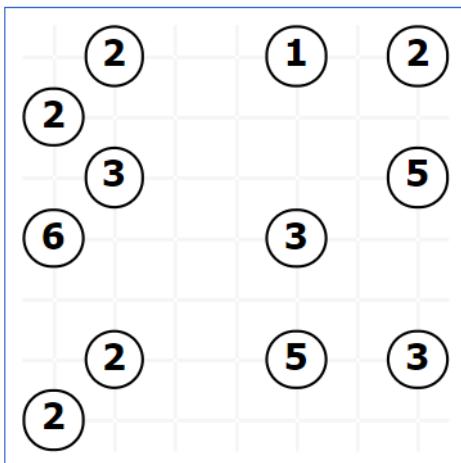

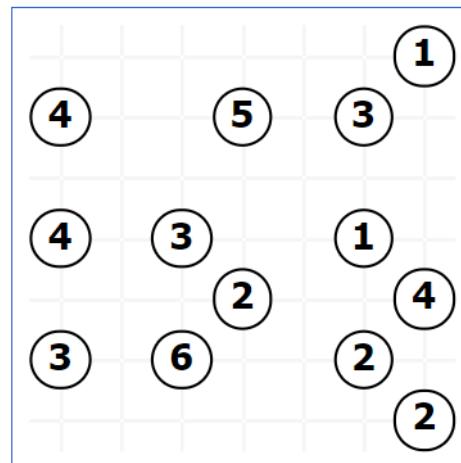

- c) Številka, ki je vpisana v otoku, pomeni, z natanko koliko mostovi je ta otok povezan z drugimi otoki.

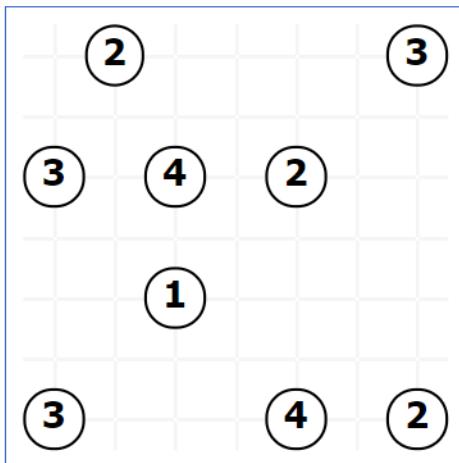

- d) Vsi otoki morajo biti povezani tako, da je možno s poljubnega otoka preko mostov priti do kateregakoli drugega otoka. Spodnja rešitev ni pravilna, saj ni posredne povezave med dvema poljubnima otokoma.
